

It's Always the Perfect Time
to Perfect your Body

Welcome to the world of **Accentuate** - a clinically proven body contouring and skin tightening solution that offers you long lasting (and fabulous!) results. Making use of the patented 40.68 MHz AlmaWave and two powerful technologies, it's the ideal solution for your abdomen, thighs or buttocks – anywhere that you could use a boost. Accentuate is safe and comfortable, and will make you feel great about your shape. The compliments are a nice bonus, too.

Accent *Prime*
Love Your Shape

"I'm so pleased with Alma Accentuate. The treatment was comfortable and painless, and I was able to get back to my normal routine immediately. Most of all, I am happy with the results... this is exactly what I was looking for – a visible change with minimum effort"

- Hanna Simone, 34, U.K.

What Can Possibly be Better than a Highly Effective Technology?

Two Highly Effective Technologies.

Accentuate achieves amazing results thanks to its synergetic pairing of two complementary technologies – Ultrasound and Radio Frequency (RF). Ultrasound technology disrupts the fat cells, while RF technology follows up with skin tightening and contouring. The intensive RF energy induces heating of various layers of the skin, contracting collagen fibers and stimulating the formation of new collagen to improve your skin's thickness and alignment. This optimal combination of technologies provides unparalleled results.

Relax & Let Accentuate Reframe your Shape

Accentuate is completely safe and comfortable, as it tightens and shapes large areas of your body. Throughout the treatment, an internal fan is continuously operated to ensure that your skin remains dry at all times. You can also prevent over heating by using a hand-held temperature control device. To ensure the utmost level of cleanliness and sanitary standards, the treatment is conducted on a washable mattress covered by a hygienic cover.

Accentuate requires no downtime and has no side effects, allowing you to get back to your routine immediately. A single-session treatment protocol composed of 20 minutes of UltraSpeed, an Ultrasound applicator that emits guided ultrasonic waves for high speed body contouring, and 40 minutes of Accentuate is all needed to achieve remarkable results.

Look and feel fantastic - fast!

Enjoy the Unique AlmaWave Effect

Accentuate utilizes Alma's unique AlmaWave, which provides deep, homogenous dielectric heating. This intensive Radio Frequency energy induces heating of various layers of the skin, contracting collagen fibers and stimulating the formation of new collagen to improve skin's thickness and alignment.

Accentuate delivers the energy deeply into the skin's tissue - leading to visible, long lasting results.

HIGHLIGHTS

- ✓ Combined Technologies for Enhanced Results
- ✓ Safe & Effective
- ✓ No Downtime; No Side Effects
- ✓ Painless Treatment
